CLASSIC₁₁

The most delicate nail polishes Classic 11 from the gel polish factory is Your Color for romantic and dreamy girls.

This season, designers remembered the classic combination of lipstick and nail polish colors. But the trend has gone further and now the shade of marigolds has become as close as possible to the pallet of not only lipsticks, but also blush! Some shades repeat the most popular colors of lipsticks.

These are varnishes of an airy-creamy consistency with a delicate nude shade. It is believed that if any shade of lipstick suits you, then a similar color of varnish will emphasize your beauty all the more.

With us, each of you will find a copy that will appeal to you and will please you, bringing a particle of gentle mood!
